

WALDEN

Life for the woods

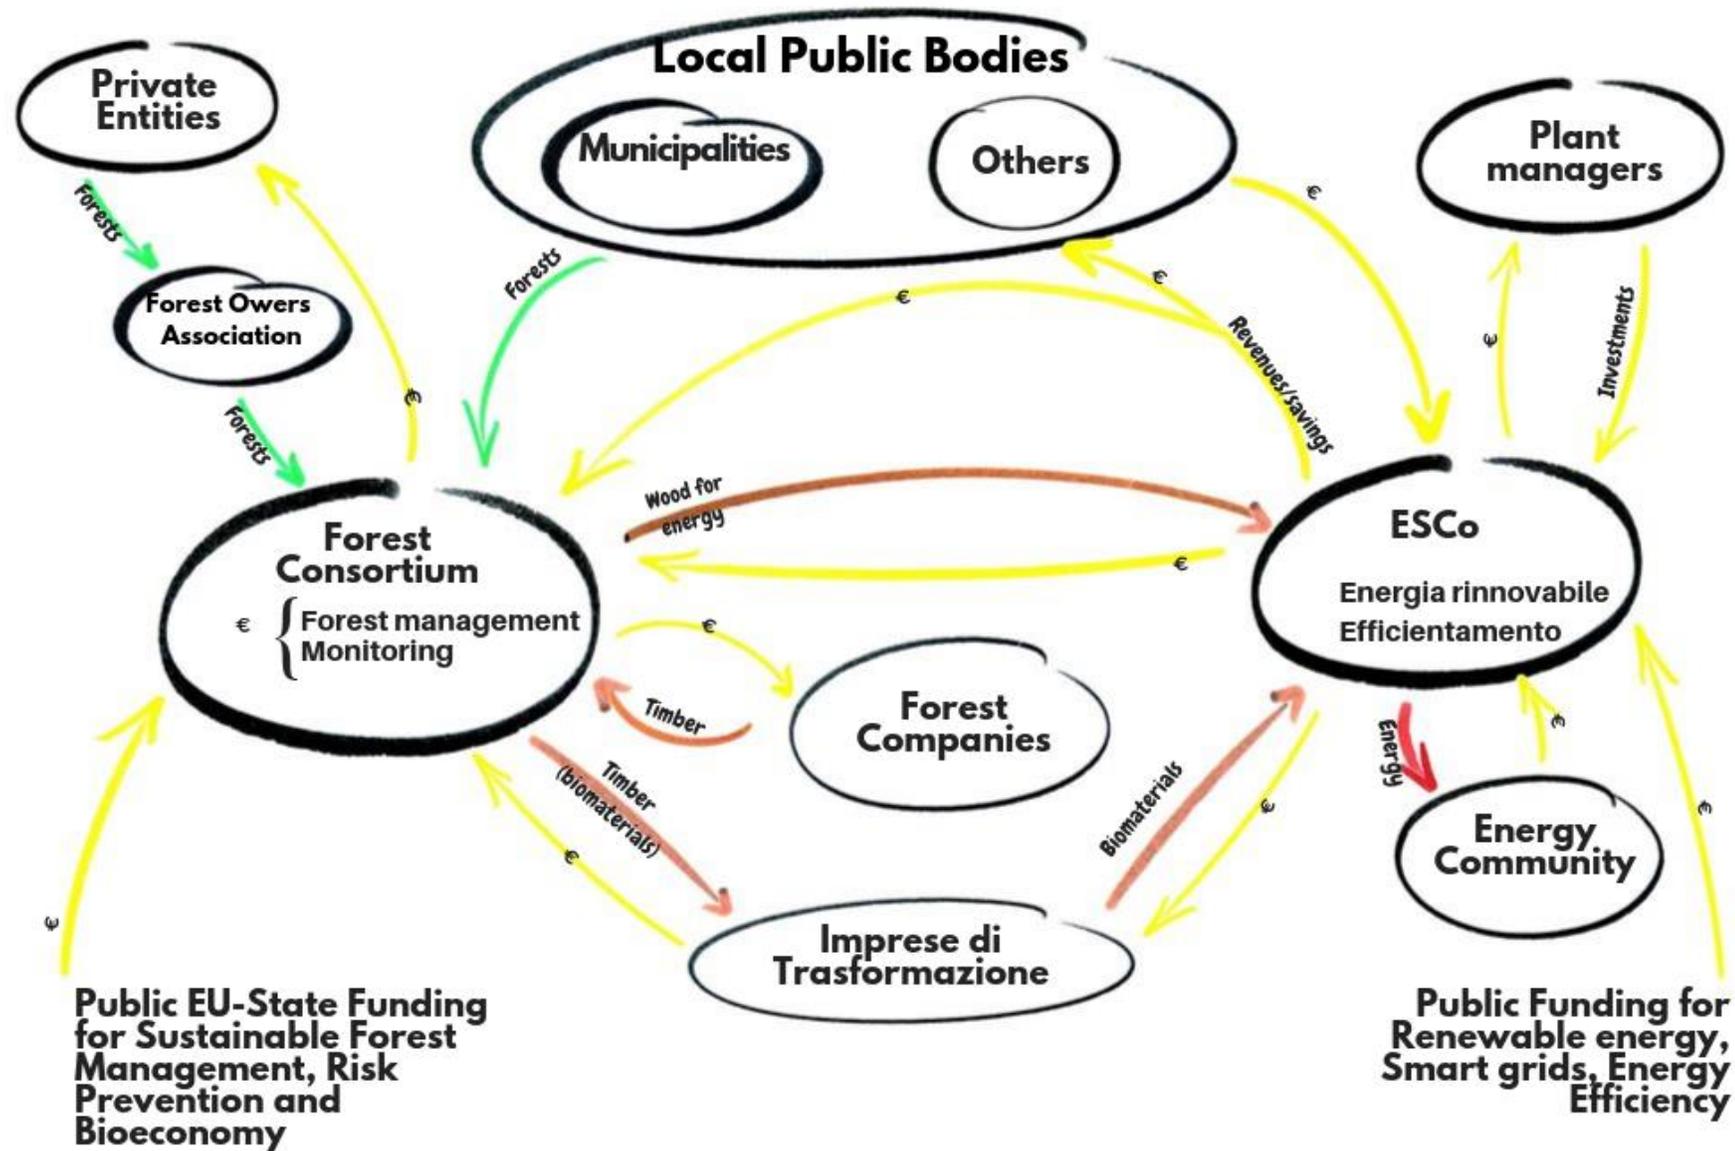

Company Profile

Fields of expertise

1. **Rural innovation**, involving other SMEs and Public Bodies of local agricultural, food, wood and tourism value chains in the development of new and sustainable products and services.
2. **Fundraising, project management** (H2020, Life, Rural Development Plans, etc) and consultancy on circular/bioeconomy, risk management, territorial planning policies and strategies
3. **Design, provision and management of electric/water/waste systems** for civil, industrial and public buildings based on solutions with low environmental-social footprint;
4. **Sustainable Forest Planning and Management** addressed to satisfy diversified economic, social, and environmental needs of local communities;

Our «kick-off» project: GreenChainSAW4Life (2019) – Life Climate Action

1. **Multidisciplinary Decision Support System** integrating forest planning and risk management with rural energy system analysis for the best local development strategy (maximising local employment and emission reduction)
2. **Participatory mechanisms** for the inclusion of all relevant stakeholder in the decision-making process
3. Selection of **Best Available Technology** for distributed renewable energy production (forest biomass, other RES)
4. Paving the way for the creation of a **Local Energy Community**, 100% renewable and self-sufficient
